

# Description

---

The `endsWith()` method returns true if a string ends with a specified string.

Otherwise it returns false.

The `endsWith()` method is case sensitive.

# Syntax

---

```
string.endsWith(searchvalue, length);
```

# Parameters

---

Parameter	Description
searchvalue	Required. The string to search for.
length	Optional. The length of the string to search. Default value is the length of the string.

# Example

---

```
let text = "John Doe";  
text.endsWith("Doe"); //true
```

Check if the 11 first characters of a string ends with "world":

```
let text = "Hello world, welcome to the universe.";
text.endsWith("world", 11); //true
```

## Return Value

---

Type	Description
A boolean	true if the string ends with the value, otherwise false.

## Browser Support

---

`endsWith()` is an [ECMAScript6 \(ES6\)](#) feature.

[ES6 \(JavaScript 2015\)](#) is supported in all modern browsers

`endsWith()` is not supported in Internet Explorer 11 (or earlier).
